DELHI DEVELOPMENT AUTHORITY,
(EM'S OFFICE)

No. EM. 1(10)83/4447

DATED: 21.3.91.

STANDING INSTRUCTION NO. 320.

Sub: Avoidance of repeat/contradictory conditions in the NIT.

It has been observed that at Para 3.10 in the

NITs under "Specifications & Conditions" the method of fixing of hinges to door frames has been provided. Again "Additional Condition" No. 4 gave the method of fixing flat iron behind the frame to receive screws extending from the frame. These methods lead to contradiction because hinges are only required to be welded with angle iron frames. As such, while incorporating any additional conditions/specification in tender papers, care must be taken to see that there is nothing contradictory or vague with reference to provision, if any, already made in the NIT elsewhere.

/ in some contracts

etc.

All C. Es must ensure compliance of these instructions while approving the NITs in future.
