CIRCULAR NO. 401

SUB: Removal of jhuggies from construction sites by the contractors after completion of works.

During a recent inspection of DDA works by Hon'ble L.G., it was observed by him that certain jhuggies constructed by the labour of the contractor were still existing in open/green areas although the work had since been completed. L.G. took a very serious view of continuance of such jhuggi clusters of the contractor's labour even after the completion of the works.

In this context, attention of all field engineers is specifically invited towards provisions of clause-6 of P&D-7 & 8 generally used for contract agreements in DDA, which clearly stipulates that Engineer-in-Charge shall not issue any certificate of completion, provisional or otherwise, until & unless the contractor has removed huts and sanitary arrangements constructed for their work people, besides removal of malba & scaffoldings etc. It has also been stipulated in Clause-6 that, in case the contractor fails to do the same, the Engineer-in-Charge can get the site cleared of all jhuggies, malba & scaffolding etc. at the expense of the contractor. It is, therefore, enjoined upon all engineers to invariably ensure that all the jhuggies/huts, constructed by the contractors at work sites for their labour, are completely removed from the work sites before issuing the completion certificate of the works. They are also directed to effectively operate Clause-6 to ensure that such jhuggies/huts of the labour are not allowed to continue at work sites after physical completion of the works.

These instructions must be strictly followed failing which it would invite disciplinary action against the erring officers/officials.
