EM'S OFFICE

NO: EM11(5)93/GTS 164

Dated:- 5-1-94

CIRCULAR NO. 416

SUB: Provision of flushing valve system.

It was observed that flushing valve system, provided in one of the housing pockets of DDA on experimental basis, was more prone to defects. The system got easily choked with dust particles coming in water and required maintenance repeatedly.

It has, therefore, been decided that in future only the normal system of providing the flushing systems shall be adopted in the D.D.A. works and the use of flushing valve system shall be stopped forthwith.

These instructions must be followed scrupulously by all the field units.

This issues with the approval of E.M./W.C., DDA.
