CIRCULAR NO. 476

Subj: - Running contracts for repetitive type of works.

CTE during their sample checking of work orders issued in a particular zone of DDA had observed that the following types of works should be got executed through running contracts on yearly basis or half yearly basis by inviting tenders so as to get competitive rates, rather than through work orders:-

1. Construction of boundary wall and chain link fencing.
2. Sweeping of roads.
3. Uealting of drains/sewerage systems.
4. Tank chlorination, chemical ~~using~~ of pumps and under ground tanks.
5. Providing drinking water by tanker.
6. Any such type of work which may come to notice and require repetition.

It is, therefore, enjoined upon all field engineers to ~~scrupulously~~ follow the above observations of CTE.
