

Delhi Development Authority

Circular NO: 235
Sub : Anti-Malaria Precautions.

Following Malaria Preventive Measures should be taken by the field staff immediately.

Construction Sites :

- (i) Stagnant Water is breeding place for mosquitoes, as such, it should be ensured that stagnant water is not allowed to stay in the abandoned water tanks/haudis constructed at site for mixing of mortars and storage of water.
- (ii) Stagnant Water should also not be allowed to stay in the excavated trenches as well as around the labour camps.
- (iii) Proper arrangement should be made for draining away, ~~the~~ sullage water so as to keep the labour camps free from mosquitoes.
- (iv) Effective arrangements should be ensured for conservancy and sanitation in the labour camps.

2. Desilting of open drains :

All open drains be got desilted regularly and no choking of drains should be allowed.

3. Oxidation Ponds :

Oxidation Ponds should be sprayed with anti-larvicidal chemical periodically and there should not be any over-flow of sewage out of Oxidation Ponds.

No. EM5 (86) 72/Vol. V/ 10942

Copy to :
