

NO:EM.1(10)83/ 20114

Dt: 27.12.80

CIRCULAR NO: 246

Sub: Anti Termite Treatment

It has been decided that here-after chemical required for Anti Termite Treatment works will be not be procured by the central stores but will be arranged departmentally by the CEs/SEs/EEs themselves. To ensure proper execution of Anti Termite Treatment work for buildings the Anti Termite Treatment work shall invariably be executed departmentally after first procuring chemicals conforming to specifications from approved and well known suppliers. If due to any special reason, the work cannot be executed departmentally in rare cases, the EEs should first obtain permission in writing from their CEs to get the work executed through specialised firms approved for doing this special work. Only firms duly approved by the Zonal Chief Engineer should be entrusted with the Anti Termite Treatment work. It is also to be ensured that chemicals procured for Anti Termite Treatment works conform to the specifications and are covered by I.S.I. marking. It may be ensured that only chemicals of approved quality are brought to site irrespective of the fact whether the work is executed departmentally or through a specialised firm. Sample of chemical should invariably be got tested from the Govt. Laboratories. Any deficiency in the quality of the chemicals bearing I.S.I. marking shall be brought to the notice of C E for taking further necessary action.

These instructions shall be strictly followed in future.
