NO:EM.1(10)83/1255

Dated: 12.11.88

C I R C U L A R NO: 236

Recently I discussed the electrical works specifications with all the SEs(Elect) and this has been standardised. Since the items that we use in all the buildings are more or less similar, the description of the item in the tender documents and estimates and the relevant specifications should be identical in all the works whether they fall under S.E.(Elect.)1,2 or 3. The additional conditions and specifications attached with the agreement are only ^{to} supplement. They should not be added in a routine manner to standard specifications of CPWD. The additional conditions should therefore, be of minimum number and with purpose. There should be no possibility of any confusion, misunderstanding or doubtful meaning in the additional conditions or specifications.
