DELM DEVELOPMENT AUTHORITY

No: DM(10)83/14711

Dt: 29-12-86

Circular No. 179

Sub: Specific place for issue of stores/materials.

It has come to notice that in some cases place of delivery for stipulated materials in contracts is mentioned as 'any DDA store' presumably to avoid claims of contractors for carriage of materials. This practice is not correct as it leads to speculation or even problems. To avoid any ambiguity it is decided that in future specific store where from materials will be supplied should be mentioned in the U.I.T. Subsequently, if it becomes necessary to supply materials from other place than mentioned in the contract, the contractors can be paid more or less depending upon whether load is more or less. Justification of tenders shall be made taking the specific place into consideration.

All engineers are requested to ensure that in future these instructions are followed.
